

ABC TUTORING PROTOTYPE

A clearer first step for families.

A phone-ready way to find the right tutor, see rates and times, and reserve a 60-minute session.

Six representative tutors for math, science, and reading.

Friendly on purpose. Clear by
design.

Parents see the essentials up front.

The path is home, tutor list, profile, then a simple booking form.

Find a fit without guessing

Filter by subject, grade, and format.
Each tutor card makes the hourly rate
and open times easy to spot.

Book with the details Dana needs

The form asks for a parent
name and email, student first
name and grade, subject,
tutor, and time. No payment
today - Dana invoices directly.

Standard 60-minute sessions

Clear choices. No extra steps.

Built for the phone.

Families can make a confident choice without needing to text for the basics.

1. Compare the right options

Filters, tutor photos, grade levels, formats, rates, bios, and available times answer the common questions up front.

2. Reserve a clear 60-minute time

The confirmation names the tutor, date, and time in plain language.

No online payment today. Dana will invoice you directly.

Mon, Oct 5 at 6:00 PM

60-minute online + in person session

**Made for
real family
schedules.**

No accounts. No payment today. Just a thoughtful first step.

See interest before you decide who to hire.

The reporting focuses on real decisions, without recording parent or student details.

Which tutors attract attention?

Tutor profile views reveal which tutors and areas families are considering.

Which subjects are in demand?

Filters and completed demo bookings point to the subjects families seek most.

Is Facebook bringing families in?

Facebook-tagged links make it possible to compare group visits with bookings.

A four-journey phone simulation demonstrates the reporting path.

Practice traffic is labeled separately, so it never clouds future live reporting.

One private system makes booking reliable.

That is the step that turns this useful demo into a reliable service.

Keep family details private

Store contact and student details in the private booking system, not in the website analytics.

Keep availability shared

Reserve a time for everyone at once, so two families cannot choose the same session.

Let Dana know right away

Send Dana an email or text only after the time is securely reserved. Staff tools to manage tutors can follow.

For now, the demo keeps entered details private and stores only a selected slot on that browser.
