

ABC TUTORING PROTOTYPE

A simpler first step for families.

A clean, friendly way to find a good tutor, see an available time, and reserve a 60-minute session.

Built for K-12 math, science, and reading - online or in person.

A warmer way to get started.

Built around family decisions.

Dana's brief guided both the layout and the booking details.

Find a fit without guesswork

Families can narrow the list by subject, grade level, and whether they need online or in-person support.

Choose a tutor with context

Each profile shows a photo, focus areas, grades, session format, hourly rate, short bio, and open times.

Standard 60-minute sessions

Clear choice. No extra math.

From a match to a reserved session.

The booking journey removes ambiguity at each step.

1. Filter for the right kind of help

Subject, grade level, and format lead to a focused list.

2. Choose an open 60-minute time

A confirmed time disappears immediately, so availability stays honest.

MEET THE TEAM

Find the right fit.

Start with the subject, grade level, or format that matters most.

4 tutors available

SUBJECT

All subjects

GRADE LEVEL

All grade levels

SESSION FORMAT

Online or in person

\$58/hr

Jordan Williams
10 years teaching
\$65/hr

Sofia Ramirez
7 years tutoring
\$52/hr

Ethan Lee
6 years tutoring
\$60/hr

Reporting answers your real questions.

Only meaningful booking signals are captured - never parent contact details.

Which tutors get attention?

Tutor profile views show where families are spending time.

Where does booking slow down?

Profile view, time selection, confirmation, and exit events show the drop-off point.

What kind of help is in demand?

Filters and completed bookings reveal subject, grade, and format interest.

Demo check: 4 simulated visitors | 2 confirmed bookings | 1 booking exit | 1 profile-only visit

Every simulated PostHog request returned HTTP 200. Filter traffic_type to simulated when reviewing the demo.
